CENTERVILLE CITY SCHOOLS
Office of the Superintendent
Jon T. Wesney

October 25, 2023

Dear Grant Review Committee Members:

On behalf of the Centerville City School District, I enthusiastically support the plans developed by the City of Centerville to extend Dimco Way - School Safety Access, to our High School, a 490,000 square foot facility on 60 acres that houses over 3000 students and staff members. This project will contribute to the safe passage of students, staff, and families from the high school.

The Centerville School District is excited to partner with the City of Centerville on this vitally important link from our High School campus to Clyo Road. We believe this extension will relieve congestion in our parking lot, create a safer point of access for our students, staff and community, increase pedestrian safety, and provide a secondary link from our campus to a major arterial road.

We are excited about the plan and fully support the City of Centerville's PDAC application. We look forward to partnering with the City on this important project for our community.

Sincerely,

Jon T. Wesney
Superintendent
Centerville City Schools
