APPLICATIONS

Integrated Shelter Systems

TOC

Supported Missions:

- Tactical Operations Centers
- UAS / ISR C2 and PED
- USAF RORO Systems and Missions
- Secure Operations – SCIFs/TSCIFs
- Transportable SATCOM
- Mobile Data Centers
- EW Mobile Systems
- Live Virtual Constructive (D-LVC)
- Support Blue Devil and Gorgon Stare

Expertise:

- Environmental control
- Power sub-systems
- Multi-level signals infrastructure
- EMI-shielding and physical security
- Mating with soft enclosures
- ISR system integration
- Aircraft / UAS integration

Electronic Enclosures

Electronics

General Capabilities:

- Rapid Prototyping / Testing
- 3-D Modeling
- Precision Machining and Fabrication
- FEA/CFD/CAD/CAM
- RF Testing and Calibration
- EMI Testing / Mitigation
- Software / Hardware Integration
- Reverse Engineering
- Airworthy Certification: DO-160, MIL-STD

Specialty Integration/Fabrication:

- Fast First Article
- Chassis Design and Build
- Integrated Electronics
- Power Management Design and Build
- Integrated Sensor Management and Control
- Logistics / Transportation / Packaging
- Special Communications and Power Enclosures
- Cable Harness Design and Fabrication

Electronics Integration/ Aircraft Modifications

Supporting Capabilities:

- Precision Machining
- Specialty Welding
- EMI Testing
- Mil Spec Connectors and Wiring
- Test Facilities / Antenna Test Range
- Custom Labeling and Painting
- Aircraft Electronic Integration
- Airworthiness Certifications
- Specialized Cabling/Harnesses

Systems Build:

- Integrated Power Systems
- Signals Interface
- Load / Weight distribution
- Rack Integration
- Transit Case Integration
- Roll-on/Roll-off Enclosures/SATCOM
- Mobile / Aerial / Maritime Systems

Aircraft Kits and Modifications

UAS and Airborne Systems Support

UAS

Advanced Manufacturing & Test Facility:

- VTOL and Fixed Wing Design/Production
- Custom Launcher Design/Production
- 10 miles from Wright Patterson AFB
- Flight line shared with USAF/OHANG
- Full service hangar operations
- Secure facilities
- Airfield tower for coordination

UAV Mission Support Services:

- 24/7 operations
- Surrogate UAS flight test support
- Full system assembly and integration
- RF frequency management
- Tower, runway, and airspace management
- EO calibration targets
- End-to-end test support
- Communication and datalink services
- Aircraft maintenance
- Cable and harness assembly
- Sensor installation and testing

SelectTech Custom UAS Designed - VTOL

VTOL Ready for Deployment

VTOL With CBRN Sensor

Stowed Position

VTOL With Radiological Sensor

“Custom designed, custom built in OHIO”

SelectTech Custom UAS Designed – Fixed Wing
